PROJECTS

Recipe Project 1. The Recipe Project is a web-based application designed to help users explore, search, and discover various recipes with ease. Developed using HTML, CSS, and JavaScript, this project provides an intuitive and user-friendly interface for browsing different recipes, viewing ingredients, and following step-by-step cooking instructions. ([Get the project details](#))

Weather App. The Weather Project is a web-based application that provides real-time weather updates for any location. Developed using HTML, CSS, and JavaScript, this project integrates a weather API to fetch live weather data, offering users temperature, humidity, wind speed, and weather conditions in an intuitive interface. ([Get the project details](#))

University Project. The University Project is a web-based platform designed to manage and display university-related information efficiently. Developed using HTML, CSS, JavaScript, and PHP, this project aims to provide an intuitive interface for students and faculty to access university details, courses, and other academic resources.
